

# Subject Index to Volume 29

## A

- Acid-base balance, anoxic heart, <sup>31</sup>P-NMR study (turtle), R1130
- Acidification, renal, growth hormone acceleration of, R1036
- Acidosis  
lactic, anoxic heart, <sup>31</sup>P-NMR study (turtle), R1130  
metabolic, phosphate transport, kidney tubules (fish), R704  
respiratory  
anoxic heart, <sup>31</sup>P-NMR study (turtle), R1130  
vasopressin responses, late-gestation fetus (sheep), R1077
- ACTH: *see* Adrenocorticotropin
- Adenosine triphosphate  
glucose infusion and, hyperglycemia, skeletal muscle, R698  
organic, erythrocyte, oxygen transport and, anemia (quail), R798
- ADH: *see* Antidiuretic hormone
- Adipocytes, formation, during refeeding after fasting, R468
- Adipose tissue  
brown: *see* Brown fat  
epididymal, refeeding after fasting, R468  
insulin effects, anestrus (hamster), R148  
lipoprotein lipase regulation, during fasting, R953  
uncoupling protein, newborn (reindeer), R1229  
white, estradiol effects, sympathetic nerve role in, R47
- Adrenal gland, type I receptors, diet and, R73
- Adrenal medulla  
catecholamines and peptides, nicotinic and muscarinic-evoked release of, R589  
secretory functions, denervated and innervated, R306
- Adrenocorticotropin  
cardiac nerve blockade, awake state, R1176  
secretion  
cortisol effects, late-gestation fetus (sheep), R385  
hypoxic conditions and, placenta (sheep), R389  
sympathetic activity, yohimbine and, R142
- Afferent fibers, renal, spinoreticular cell response, R27
- Afferents, visceral, intestinal satiety and, R503
- Aging  
cold acclimation, metabolic and behavioral responses, R284  
HSP70 and mRNA expression, heat-induced hyperthermia and, R663
- Alcohol  
downregulation induced by, superoxide anion release, hepatic phagocytes, R969  
ethyl, endotoxin-enhanced glucose metabolism and, R1058
- Aldosterone  
angiotensin II synergy, salt appetite, R421  
central venous pressure, exercise training-induced hypervolemia, R273  
half-life, hemodynamic, renal and hormonal effects (monkey), R804  
macronutrient intake and, R73
- Amiloride  
GH-enhanced volume absorption and, kidney tubules, R1036  
pH effects, phosphate transport, kidney tubules (fish), R704
- Amino acids  
 $\beta$ -, transport, renal brush-border membranes (snake), R879  
dietary limiting, injection into prepyriform cortex, R525  
efflux, volume-activated, erythrocytes (skate), R1014  
intestinal, brush-border membrane vesicles (fish), R563  
metabolism, species differences (holostean, teleost), R159
- $\gamma$ -Aminobutyric acid  
hypothalamic neurons and, heart rate, R13  
stimulation, superior laryngeal nerve, R290
- 2-Amino-5-phosphonopentanoic acid, dorsomedial hypothalamus, heart rate and, R13
- Ammonium, excretion, growth hormone acceleration of, R1036
- Anaerobiosis, 6-phosphofructo-2-kinase during (mollusk), R1168
- Anemia, blood oxygen transport in, role of organic phosphates (quail), R798
- Anestrus, insulin-induced (hamster), R148
- ANF: *see* Atrial natriuretic factor
- Angiotensin  
chronic hypertension, saralasin effects, fetus (lamb), R811  
organum cavum pre-lamina terminalis, R396  
peripheral mechanism of lability, after sinoart deafferentation, R359  
receptors: *see* Receptors  
sodium appetite and, sexual dimorphism, R1082
- Angiotensin II  
aldosterone synergy, salt appetite, R421  
ANP interactions, blood pressure and sympathetic outflow, R1145  
half-life, hemodynamic, renal and hormonal effects (monkey), R804  
pressure natriuresis and, volume expansion, R1200  
spontaneous hypertension and, ventrolateral medulla, R977  
water intake and, genetic polydipsia, R1152
- Anorexia  
corticotropin-releasing hormone-induced, brain oxytocin receptor mediation of, R448  
TNF-induced, area postrema lesions and, R906
- Anoxia  
cerebral blood flow, chemical regulation (turtle), R382  
during graded carbon dioxide and lactic acidosis, <sup>31</sup>P-NMR study (turtle), R1130  
metabolic arrest and, cortical neurons (turtle, rat), R747  
vasopressin responses to, late-gestation fetus (sheep), R1077
- ANP: *see* Atrial natriuretic peptide
- Antidiuretic hormone: *see also* Vasopressin  
differential effects, thick ascending limb, kidney, R1023  
hypoxia and hypercapnia, late-gestation fetus (sheep), R1077  
opioid interaction, during rapid hemorrhage, awake state, R373  
secretion, osmotic and nonosmotic tests, R533
- Aorta, abdominal, vasoreactivity in chronic hypoxia, R1114
- Arachidonic acid, metabolism, nervous system (mollusk), R844
- Area postrema, lesions, TNF-induced anorexia and learned food aversions, R906
- Atenolol, action on endolymphatic sac DC potential,  $\beta_2$ -receptor mediation of, R911
- ATP: *see* Adenosine triphosphate
- Atrial hemodynamic factor, hemodynamic effects, awake state, R247
- Atrial natriuretic factor  
cardiopulmonary baroreceptor deactivation and, R642  
decrease with maturation, renal response to, fetus (sheep), R346  
glomerular, regulation by renal sympathetic nerves, R1043  
neuronal and cardiovascular responses, microinjection to nucleus ambiguus, R1089  
pharmacokinetics, NEP and C-ANF receptors in, R208  
physiological variations of, renal and endocrine effects, R217  
responses, epinephrine, fetal (sheep), R82  
transgenesis, kidney function and, R1
- Atrial natriuretic peptide  
angiotensin II interactions, blood pressure and sympathetic outflow, R1145  
central venous pressure, exercise training-induced hypervolemia, R273  
inhibition  
isolated lymphatic ducts, R610  
thirst and vasopressin release, R475  
mechanism of clearance, maturation and, R1218  
precession of sodium over insulin, renal, R1183  
receptor subtypes, hypertension, brain, R441  
secretion, perfused atria, R39  
water and sodium chloride absorption with, intestine, R6
- Autonomic nervous system  
endogenous and exogenous catecholamines, metabolic and hemodynamic responses, R785  
facial nerve-elicited cerebral vasodilation, laser-Doppler flowmetry, R255  
hyperoxia effects, rest and exercise, R873

**Autoradiography**  
 receptor subtypes for natriuretic peptides, hypertensive brain, R441  
 tritiated thymidine, new adipocyte formation during refeeding after fasting, R468

**Aversion, conditioning, prostaglandin role in (fish), R839**

**Awake state**  
 ANF effects, R247  
 arterial pressure, hyperinsulinemia effects, R764  
 chronic hypoxia, system vasoreactivity in, R1114  
 CNS norepinephrine release, hypotension and hyperosmolality, R1071  
 morphine effects (pig), R1051  
 outflow pressure effects, intestinal lymph flow (sheep), R668  
 procaine infusion, cardiac nerve blockade and, R1176  
 rapid hemorrhage, vasopressin and opioid interaction, R373  
 regional hemodynamics, endothelin-1 and sarafotoxin S6b effects, R1210  
 vasopressin and autonomic mechanisms, central serotonin, R1188

**B**

**Bacteremia, postoperative, kinetics of plasma fibronectin, R553**

**Behavior**  
 feeding, drug-induced vs. food deprivation-induced, R546  
 oviposition, prostaglandins and, non-mammalian vertebrates, R854  
 water satiation, dopamine modulation of prolactin and vasopressin (sheep), R1194

**Benzene, solubility, anesthetic potency in relation to, R540**

**Bicarbonate, reabsorption, growth hormone acceleration of, R1036**

**Bicuculline methiodide, dorsomedial hypothalamus, heart rate and, R13**

**Bile duct, ligation, renal nerves in cirrhosis and heart failure, R298**

**Blockade**  
 cardiac nerve, procaine infusion, awake state, R1176  
 conduction, gaseous substances and, R540

**Blood-brain barrier, insulin levels, satiety, seasonal changes (marmot), R712**

**Blood flow: see also Circulation**  
 cerebral  
   chemical regulation (turtle), R382  
   during hypercapnia, R1066  
   laser-Doppler flowmetry, R255  
 endothelin-1 and sarafotoxin S6b effects, awake state, R1210  
 regional, norepinephrine tracer kinetics and, R946  
 renal, time course of responses to splanchnic nerve stimulation, R894

**Blood pressure: see also Pressure**  
 arterial, hyperoxia effects, rest and exercise, R873  
 central serotonin, vasopressin and autonomic mechanism mediation of, R1188  
 chronic hypertension, saralasin effects, fetus (lamb), R811  
 control, rapid hemorrhage, awake state, R373

dorsomedial hypothalamus and, GABA and excitatory amino acid receptors, R13  
 endothelin-1 and sarafotoxin S6b effects, awake state, R1210  
 larval hemodynamics (bullfrog), R240  
 parabrachial nucleus, cardiovascular influences on, R225  
 physiological ANF effects, R127  
 procaine infusion and, cardiac nerve blockade, awake state, R1176  
 recombinant prorenin infusion and (monkey), R804  
 sinoaortic denervation and, after endothelin, R739  
 sympathetic outflow and, angiotensin II and ANP interactions, R1145  
 vagal baroreflex response after acute exercise, R570  
 wheelchair-dependent quadriplegics, R576

**Blood volume: see also Volume**  
 central venous pressure, elevated, hypervolemia and, R273  
 expansion, kidney function in ANF transgenesis, R1

**Body**  
 composition  
   type I adrenocorticoid receptor stimulation and, R73  
   weight cycling, fat intake during, exercise effects, R518  
   fat: see Fat  
   weight: see Weight

**Bombesin, food intake induced by, capsaicin effects, R263**

**Bradykinin, contractility and, myocardial, R1095**

**Brain**  
 blood flow: see Blood flow  
 distortion, CSF dynamics and, R172  
 hypertensive, receptor subtypes for natriuretic peptides, R441  
 infarct, interstitial and intracellular pH in, R581  
 oxytocin receptors, corticotropin-releasing hormone-induced anorexia, R448

**Brain stem**  
 discharges, postganglionic sympathetic nerves, R1159  
 parabrachial nucleus, cardiovascular influences on, R225

**Bromocriptine, drinking behavior and, water satiation (sheep), R1194**

**Brown fat**  
 contribution, central prostaglandin-evoked hyperthermia, R59  
 energy metabolism, neuropeptide Y effects, R321  
 interscapular, neuropeptide Y and sympathetic activity, R328  
 $\beta$ -oxidation and energy balance in, peroxisome proliferator effects, R278  
 uncoupling protein, newborn (reindeer), R1229

**Brush-border membrane, renal, taurine transport (snake), R879**

**Brush-border membrane vesicles, intestinal, peptide transport (fish), R563**

**Butanol, tertiary, endotoxin-enhanced glucose metabolism and, R1058**

**C**

**Cachectin, TNF-induced, area postrema lesions and, R906**

Calcitonin, differential effects, thick ascending limb, kidney, R1023

**Calcium**  
 cardiac-activator, seasonal changes of (squirrel), R353  
 differential effects, thick ascending limb, kidney, R1023

**Caloric regulation, food intake and hunger, high fat and carbohydrate effects, R756**

**cAMP: see Adenosine monophosphate, cyclic**

**Capsaicin, bombesin-induced food intake and, R263**

**Captopril**  
 angiotensin II effects on water intake and, genetic polydipsia, R1152  
 pressure natriuresis and, volume expansion, R1200

**Carbohydrates**  
 intake, type I adrenocorticoid receptor stimulation and, R73  
 metabolism, endotoxin-enhanced, ethanol effects, R1058  
 oxidation  
   hyperglycemia, skeletal muscle, R698  
   skeletal muscle, during euglycemic hyperinsulinemia, R113  
 preload, food intake and hunger with, R756  
 taste, chemoreception for, R192

**Carbon dioxide**  
 anesthesia, angiotensin II-aldosterone synergy, R421  
 graded, anoxic heart,  $^{31}\text{P}$ -NMR study (turtle), R1130  
 hypercapnia, vascular responses of choroid plexus, R1066

**Carbonic anhydrase isoform, intracellular, soleus muscle fatigue and recovery and, R615**

**Cardiac nerve, blockade: see Blockade**

**Cardiac output**  
 ANF effects, awake state, R247  
 endothelin-1 and sarafotoxin S6b effects, awake state, R1210

**Cardiovascular regulation, ANF microinjection, nucleus ambiguus, R1089**

**Carotid artery, occlusion, denervated and innervated medullary functions, R306**

**Catecholamines**  
 action on endolymphatic sac DC potential,  $\beta_2$ -receptor mediation of, R911  
 adrenal, nicotinic- and muscarinic-evoked release of, R589  
 baroreflex response, quadriplegics, R576  
 endogenous and exogenous, metabolic and hemodynamic responses, R785  
 hypothalamic release, sodium chloride in sinoaortic denervation, R733  
 physiological ANF effects, R127  
 renal and hormonal responses to, fetal (sheep), R82  
 sympathoadrenal activation, sinoaortic denervation and, after endotoxin, R739  
 turnover, estradiol and, white adipose tissue, R47  
 vagal baroreflex response, wheelchair-dependent quadriplegics, R576  
 vascular response of choroid plexus and, during hypercapnia, R1066

**Cathepsin, inhibition, eccrine sweat, R314**

**Cavum septi pellucidi, morphology and physiology, R396**

CCK: *see* Cholecystokinin  
 Cecum, vagal innervation, topography, R200  
 Central nervous system  
   angiotensin II and ANP, cardiovascular effects, R1145  
   arachidonic acid metabolism (mollusk), R844  
   norepinephrine release, hypotension and hyperosmolality, awake state, R1071  
 Cerebral ventricles  
   capsaicin, suppression of sham feeding, R681  
   fifth, morphology and physiology, R396  
   third, neuropeptide Y and sympathetic activity, R328  
 Cerebrospinal fluid  
   dynamics, experimental brain compression and, R172  
   insulin levels, seasonal changes (mammot), R712  
 $\alpha$ -Chloralose, sympathoadrenal activation, sinoaortic denervation and, after endotoxin, R739  
 Chloride  
   differential effects, thick ascending limb, kidney, R1023  
   excretion, renal, ANF transgenesis and, R1  
 2-Chloroadenosine, hypotension produced by, CNS norepinephrine release and, awake state, R1071  
 Cholecystokinin  
   capsaicin and, suppression of sham feeding, R681  
   conditions, flavor preferences and, R179  
   glucagon and, satiety, R689  
   receptors: *see* Receptors  
   vagotomy effects, intestinal satiety, R503  
 Cholecystokinin octapeptide, soup interaction, reduction of food intake, R672  
 Choroid plexus, vascular responses, hypercapnia, R1066  
 Chromaffin cells, catecholamines and peptides, nicotinic- and muscarinic-evoked release of, R589  
 Circulation: *see also* Blood flow  
   larval hemodynamics (bullfrog), R240  
   cirrhosis, sodium retention in, cirrhosis and congestive heart failure, R298  
 Cold  
   acclimation  
     aging effects, R284  
     leukotriene metabolism in (bullfrog), R834  
 Colon, vagal innervation, topography, R200  
 Compliance  
   CSF dynamics, experimental brain compression and, R172  
   venous, exercise training-induced hypervolemia, R273  
 Congestive heart failure, sodium retention in, cirrhosis and congestive heart failure, R298  
 Convulsions: *see* Seizures  
 Coronary artery, ligation, renal nerves in cirrhosis and heart failure, R298  
 Coronary flow, bradykinin effects, myocardial contractility, R1095  
 Corticosterone  
   macronutrient intake and, R73  
   secretion, prolonged exercise effects, R717  
 Corticotropin-releasing hormone, anorexia induced by, brain oxytocin receptor mediation of, R448

Cortisol  
   ACTH secretion and, late-gestation fetus (sheep), R385  
   free-running rhythms, sleep and, Antarctica, R1137  
 CRH: *see* Corticotropin-releasing hormone  
 CSF: *see* Cerebrospinal fluid  
 Cyclooxygenase, comparative physiology, invertebrates, R849  
 Cystatin, inhibition, eccrine sweat, R314  
 Cysteine proteinase, inhibitor, eccrine sweat, R314  
 Cytokines  
   sleep regulation and, R52  
   vitamin E and, acute phase response in exercise, R1235

## D

Deoxycorticosterone acetate-salt, antinatriuretic response to air stress, high potassium intake effects, R941  
 Desipramine  
   central sympathoinhibition, neuronal uptake blockade and, R824  
   sympathetic nerve firing and, norepinephrine spillover to plasma, R817  
 Deuterium, incorporation, body fat (pig), R627  
 Development: *see also* Growth; Maturation  
    $\alpha$ -adrenoceptor subtypes during (sheep), R407  
   larval hemodynamics (bullfrog), R240  
   salt appetite, angiotensin II-aldosterone synergy, R421  
 Diabetes, sleep in, interleukin 1 effects, R995  
 Diabetes mellitus, non-insulin-dependent, carbohydrate oxidation, skeletal muscle, R113  
 Dihydroxyphenylglycol  
   central sympathoinhibition, neuronal uptake blockade and, R824  
   sympathetic nerve firing and, norepinephrine spillover to plasma, R817  
 Dimethylphenylpiperazine, secretory functions, adrenal medulla, R306  
 1,3-Diphenyl-1,3,5-hexatriene, polarization, sodium pump, erythrocytes (trout), R916  
 Diuresis  
   response, lower body negative pressure (monkey), R724  
   substance P and, R232  
 Dobutamine, action on endolymphatic sac DC potential,  $\beta_2$ -receptor mediation of, R911  
 DOCA: *see* Deoxycorticosterone acetate  
 Dopamine  
   adrenal, nicotinic- and muscarinic-evoked release of, R589  
   modulation, water satiation (sheep), R1194  
 Dorsomedial medulla, norepinephrine release, hypotension and hyperosmolality, awake state, R1071  
 Drinking  
   organum cavum pre-lamina terminalis, R396  
   procaine infusion and, cardiac nerve blockade, awake state, R1176  
   sodium appetite and, sexual dimorphism, R1082  
   vasopressin release and, ANP inhibition, R475

vasopressin secretion, osmotic and non-osmotic tests, R533  
 water satiation, dopamine effects (sheep), R1194  
 Duodenum, vagal innervation, topography, R200

## E

Edema  
   intestinal, outflow pressure effects, awake state (sheep), R668  
   pulmonary, endotoxin shock, LTD antagonist treatment (pig), R1007  
 EEG: *see* Electroencephalography  
 Eicosanoids  
   comparative physiology, R833  
   invertebrates, R849  
   emesis, learned aversion and chemical defense (fish), R839  
   metabolism, nervous system (mollusk), R344  
 Electroencephalography  
   fetal, morphine activation of, R509  
   interleukin 1 receptor antagonist effects, sleep and fever, R453  
   spectral analysis, sleep deprivation during hibernation (squirrel), R1123  
 Electrolytes, free-running rhythms, sleep and, Antarctica, R1137  
 Emesis, learned aversion and chemical defense, prostaglandin role in (fish), R839  
 Endocrine gland, ANF physiological variations and, R127  
 Endolymphatic sac, DC potential, catecholamine action on,  $\beta_2$ -receptors and, R911  
 Endopeptidase  
   neutral  
     ANF pharmacokinetics, R208  
     clearance mechanisms, maturation and, R1218  
 Endothelin, renal vasculature and, R653  
 Endothelin-1, sarafotoxin S6b and, regional hemodynamics in awake state, R1210  
 Endothelium-derived relaxing factor nonprostanoid, vessels (trout), R925  
 renal vasculature and, R653  
 Endotoxemia, superoxide anion release, alcohol-induced downregulation of, phagocytes, R969  
 Endotoxin  
   glucose metabolism enhanced by, ethanol effects, R1058  
   sinoaortic denervation after, sympathoadrenal activation in, R739  
 Energy  
   balance  
     estradiol and, white adipose tissue, R47  
     milk intake and use and, pup, R1104  
     peroxisome proliferator effects, obesity, R278  
     expenditure, deuterium incorporation, body fat (pig), R627  
     metabolism, neuropeptide Y effects, R321  
 Epinephrine  
   endogenous and exogenous, metabolic and hemodynamic responses, R785  
   peripheral mechanism of lability, after sinoaortic deafferentation, R359  
   renal and hormonal responses to, fetal (sheep), R82

Epinephrine (*continued*)

- secretory functions, adrenal medulla, R306
- spillover, yohimbine and, R142
- sympathoadrenal activation, sinoaortic denervation and, after endotoxin, R739

## Erythrocytes

- organic phosphates, blood oxygen transport in anemia and (quail), R798
- sodium pump of, temperature compensation (trout), R916
- taurine efflux, volume-activated (skate), R1014

## Estradiol

- pregnancy and, fatty acid synthesis (hamster), R153
- sympathetic nerves and, white adipose tissue, R47

## Estrogen, sodium appetite and, sexual dimorphism, R1082

## Estrous cycle, insulin effects (hamster), R148

## Ethanol

- downregulation induced by, superoxide anion release, hepatic phagocytes, R969
- oxidation, endotoxin-enhanced glucose metabolism and, R1058

## Exercise

- acute phase response, cytokines and vitamin E, R1235
- air temperature effects and, ventilation and thermoregulation (bat), R960
- baroreflex response after, vagal, R570
- fat intake and, during weight cycling, R518
- hormonal response to, hepatic vagotomy effects, R67
- metabolism, ventromedial hypothalamic lesions, R368
- rest and, sympathetic activity, hyperoxia effects, R873
- suppression of puberty and, R717
- training, hypervolemia induced by, elevated central venous pressure, R273

## F

## Facial nerve, cerebral vasodilation elicited by, laser-Doppler flowmetry, R255

## Fasting

- lipoprotein lipase regulation, muscle and adipose tissue, R953
- prolonged, adaptations to, weaned pups (seal), R267
- refeeding after, new adipocyte formation, R468

## Fat

- body
  - suprachiasmatic and paraventricular control (hamster), R90
  - suprachiasmatic nucleus lesions and (hamster), R102
  - water hydrogen incorporation into (pig), R627
- intake, during exercise, during weight cycling, R518
- preload, food intake and hunger with, R756

## Fatty acids

- free, concentration and secretion during prolonged hyperthermia, R480
- synthesis, pregnancy and ovarian steroid effects (hamster), R153

## Feedback, negative, cortisol effects, late-gestation fetus (sheep), R385

## Feeding

- bombesin-induced suppression, capsaicin effects, R263
- control of intake, glucagon and CCK, R689
- CRH-induced anorexia, brain oxytocin receptor mediation of, R448
- diet, type I adrenocorticoid receptor stimulation and, R73
- dietary sodium deprivation, sodium appetite after, R1082
- drug-induced, vs. food deprivation-induced, behavior, R546
- exercise effects, fat intake during weight cycling, R518
- food aversions, learned, area postrema lesions, R906
- food intake and hunger, high fat and carbohydrate effects, R756
- high-potassium diet, salt-induced hypertension and, R21
- mediation of, CCK-A receptor, R693
- melatonin infusion, suprachiasmatic nucleus lesions and (hamster), R102
- photoperiodism, suprachiasmatic and paraventricular control (hamster), R90
- reduction of intake, CCK-8 and soup interaction, R672
- regulation
  - amino acid injection, prepyriform cortex, R525
  - insulin regulation, seasonal changes (marmot), R712
  - satiety, vagotomy effects, R503
  - sham, suppression, fourth ventricular capsaicin and, R681

## Fenn effects, variable series elasticity, skeletal and cardiac muscle, R649

Fetus: *see also* Gestation; Placenta;

- Pregnancy
  - ANF decrease with maturation, renal response to (sheep), R346
  - chronic hypertension, saralasin effects (lamb), R811
  - EEG, morphine-induced activation, R509
  - late-gestation
    - cortisol and ACTH secretion (sheep), R385
    - vasopressin responses to hypoxia and hypercapnia (sheep), R1077

## Fever

- interleukin 1 effects, sleep, R52
- prostaglandin-evoked, brown fat and, R59

## Fibronectin, plasma, after postoperative bacteremia, R553

## Filtration

- glomerular
  - ANF decrease with maturation and, fetus (sheep), R346
  - cardiopulmonary baroreceptor deactivation and, R642
- Flowmetry, laser-Doppler, facial nerve-elicited cerebral vasodilation, R255

## Fluid

- cerebrospinal: *see* Cerebrospinal fluid excretion, renal, ANF transgenesis and, R1
- Follicle-stimulating hormone, secretion, prolonged exercise effects, R717
- FNLP: *see* N-Formyl-neoleucyl-leucyl-phenylalanine

- N-Formyl-neoleucyl-leucyl-phenylalanine, lipopolysaccharide-primed lung injury, R413
- Fructose 2,6-bisphosphate, during anaerobiosis (mollusk), R1168

## G

- Gaseous substances, conduction blockade and, R540
- Gastric distension, inhibition, arterial baroreflex, R985
- Gastrointestinal tract, innervation, vagal, topography of, R200
- Gestation: *see also* Fetus; Placenta; Pregnancy
  - prostaglandins and, nonmammalian vertebrates, R854
- GH: *see* Growth hormone
- Glioma cells, prostaglandin synthesis, angiotensin receptor mediation of, R1000
- Glucagon
  - concentration and secretion, prolonged hypothermia, R480
  - differential effects, thick ascending limb, kidney, R1023
- Glucconeogenesis
  - ethanol oxidation effects, R1058
  - inhibition, hormonal response to exercise in, vagotomy effects, R67
- Glucoregulation, endotoxic shock, phorbol 12-myristate 13-acetate and, R494
- Glucose
  - accumulation, hyperglycemia and, skeletal muscle, R698
  - concentration and secretion, prolonged hypothermia, R480
  - metabolism, endotoxin-enhanced, ethanol and, R1058
- Glutamate, stimulation, superior laryngeal nerve, R290
- L-Glutamate, spontaneous hypertension and, ventrolateral medulla, R977
- Glutamine, metabolism, species differences (holostean, teleost), R159
- Glycyl-L-phenylalanine, intestinal, brush-border membrane vesicles (fish), R563
- Gonadectomy, sodium appetite and, sexual dimorphism, R1082
- Gonadotropin-releasing hormone, brain lesions, photoperiodism and (hamster), R90
- Growth: *see also* Development; Maturation
  - milk nutrient intake and use, R1104
  - water hydrogen incorporation, body fat (pig), R627
- Growth hormone
  - acid secretion and, renal tubules, R1036
  - secretion, prolonged exercise effects, R717
- Guanosine monophosphate, cyclic
  - ANP clearance mechanisms and, maturation, R1218
  - regulation of ANF receptors, renal nerves, R1043
- Gustatory response, starch taste, chemoreception for, R192

## H

## Heart

- anoxic, graded carbon dioxide and lactic acidosis, <sup>31</sup>P-NMR study (turtle), R1130

- desipramine effects, sympathetic nerve firing, R817
- failure: *see* Congestive heart failure
- function, graded carbon dioxide and lactic acidosis,  $^{31}\text{P}$ -NMR study (turtle), R1130
- mechanical restitution, activity and hibernation (squirrel), R353
- Heart atria, ANP secretion, atrial pressure, distension, and pacing frequency in, R39
- Heart rate
- ANF microinjection, nucleus ambiguus, R1089
- angiotensin II effects, ventrolateral medulla, R977
- anoxia, graded carbon dioxide and lactic acidosis,  $^{31}\text{P}$ -NMR study (turtle), R1130
- central serotonin, vasopressin and autonomic mechanism mediation of, R1188
- dorsomedial hypothalamus and, GABA and excitatory amino acid receptors, R13
- sinoaortic denervation and, after endotoxin, R739
- Heat
- acclimation, leukotriene metabolism in (bullfrog), R834
- body, content, morphine effects, awake state (pig), R1051
- Hematocrit, physiological ANF effects, R127
- Hemorrhage
- IL-6 and TNF levels after, differential alterations in, R167
- rapid, vasopressin and opioid interaction, awake state, R373
- Hibernation
- activity and, cardiac mechanical restitution (squirrel), R353
- insulin levels, CSF, satiety and (marmot), R712
- sleep deprivation and (squirrel), R1123
- Hormonal responses, epinephrine, fetal (sheep), R82
- Hormones: *see also* specific hormone
- prorenin effects (monkey), R804
- Hydralazine, sympathoadrenal activation, sinoaortic denervation and, after endotoxin, R739
- Hydrocortisone sodium succinate, ACTH secretion and, late-gestation fetus (sheep), R385
- Hydrogen, water, incorporation, body fat (pig), R627
- Hydrogen ions, secretion, prostaglandin regulation of, epithelia (frog), R866
- 12-Hydroxyperoxyeicosatetraenoic acid, metabolism, nervous system (mollusk), R844
- 5-Hydroxytryptamine: *see* Serotonin
- Hypercapnia
- cerebral blood flow, chemical regulation (turtle), R382
- vascular responses during, choroid plexus, R1066
- vasopressin responses to, late-gestation fetus (sheep), R1077
- Hyperfiltration, spontaneous hypertension, renal vascular resistance, R889
- Hyperglycemia, glucose accumulation and, skeletal muscle, R698
- Hyperinsulinemia
- arterial pressure and, awake state, R764
- euglycemic, carbohydrate oxidation, skeletal muscle, R113
- Hyperosmolality, CNS norepinephrine release during, awake state, R1071
- Hyperoxia, sympathetic activity and, rest and exercise, R873
- Hypertension
- chronic, saralasin effects, fetus (lamb), R811
- DOCA-salt, high potassium intake effects, R941
- essential and experimental, immune mechanisms of, R459
- hyperinsulinemia and, awake state, R764
- portal, intestinal lymph flow (sheep), R668
- receptor subtypes for natriuretic peptides, brain, R441
- renal, angiotensin II effects, R1200
- salt-induced acceleration of, high-potassium diet and, R21
- salt-sensitive, volume expansion and, R32
- spontaneous
- angiotensin II effects, ventrolateral medulla, R977
- renal vascular  $\alpha_1$ -adrenergic receptor responsiveness, R889
- Hyperthermia
- heat-induced, HSP70 and mRNA expression in aging, R663
- morphine, awake state (pig), R1051
- prostaglandin-evoked, brown fat and, R59
- Hypervolemia
- exercise training-induced, elevated central venous pressure, R273
- kidney function, ANF transgenesis and, R1
- Hypoglycemia, vasopressin secretion, osmotic and nonosmotic tests, R533
- Hypotension
- CNS norepinephrine release during, awake state, R1071
- vagal baroreflex response, wheelchair-dependent quadriplegics, R576
- Hypothalamus
- anterior, neuropeptide Y effects, interscapular brown fat, R328
- defense region, stimulation of, coronary vasoconstriction during, R335
- dorsomedial, GABA and excitatory amino acid receptors, R13
- norepinephrine release
- hypotension and hyperosmolality, awake state, R1071
- sodium chloride in sinoaortic denervation, R733
- ventromedial, lesions, exercise metabolism in, R368
- Hypothermia, glucagon, glucose and fatty acid concentration, R480
- Hypoxia
- ACTH secretion and, placenta (sheep), R389
- behavioral thermoregulation and, R120
- cerebral blood flow, chemical regulation (turtle), R382
- chronic, system vasoreactivity in, R1114
- vasopressin responses to, late-gestation fetus (sheep), R1077
- IL-6: *see* Interleukin 6
- Immune system, mechanisms, experimental and essential hypertension, R459
- Infarction, myocardial, renal nerves in cirrhosis and heart failure, R298
- Insulin
- anestrus induced by (hamster), R148
- diabetes, sleep in, interleukin 1 effects, R995
- endotoxic lethality, glucose dyshomeostasis and, R494
- hyperinsulinemia, arterial pressure and, awake state, R764
- levels, CSF, seasonal changes (marmot), R712
- precession of sodium over, renal, R1183
- response to exercise, hepatic vagotomy effects, R67
- Insulin-like growth factor, acid secretion and, renal tubules, R1036
- Interleukin, sleep and, diabetes, R995
- Interleukin 1
- acute phase response, exercise, R1235
- sleep and, R52
- sleep and fever induced by, interleukin 1 receptor antagonist effects, R453
- Interleukin 6
- acute phase response, exercise, R1235
- plasma levels, after trauma and hemorrhage, R167
- Interstitial space, pH, evolving brain infarct, R581
- Intestine
- brush-border membrane vesicles, peptide transport (fish), R563
- lymph flow, outflow pressure effects, awake state (sheep), R668
- water and sodium chloride absorption, ANP effects, R6
- Ischemia, cerebral, interstitial and intracellular pH in, R581
- Isoproterenol
- differential effects, thick ascending limb, kidney, R1023
- tracer kinetics, regional blood flow and site of infusion effects, R946
- Isotopes, radioactive, zinc kinetics, R134
- J**
- Jejunum, water and sodium chloride absorption, ANP effects, R6
- K**
- Kidney
- $\alpha$ -adrenoceptor subtypes, during development (sheep), R407
- ANF physiological variations and, R127
- brush-border membrane, taurine transport (snake), R879
- denervation
- ANF receptor subtype regulation and, R1043
- renal nerves in cirrhosis and heart failure, R298
- desipramine effects, sympathetic nerve firing, R817
- function
- ANF transgenesis, R1
- prorenin effects (monkey), R804
- hemodynamics, angiotensin II effects, volume expansion, R1200
- partial infarction, experimental and essential hypertension, R459
- precession of sodium over insulin, sodium excretion and, R1183
- I**
- Ileum, water and sodium chloride absorption, ANP effects, R6

## Kidney (continued)

- response
  - ANF decrease with maturation, fetus (sheep), R346
  - cardiopulmonary baroreceptor deactivation and, R642
  - epinephrine, fetal (sheep), R82
  - lower body negative pressure (monkey), R724
  - splanchnic nerve stimulation, time course of responses, R894
  - thick ascending limb, ADH effects, R1023
  - vascular  $\alpha_1$ -adrenergic receptor, responsiveness, spontaneous hypertension after, R889
  - vasculature, endothelium-derived vasoactive factors and, R653
- Kidney glomerulus, ANF receptor subtypes, regulation by sympathetic nerves, R1043
- Kidney medulla, hemodynamics, angiotensin II effects, volume expansion, R1200
- Kidney papilla, necrosis, precession of sodium over insulin, R1183
- Kidney tubules
  - acid secretion, growth hormone acceleration of, R1036
  - phosphate transport, pH effects (fish), R704
  - proximal
    - apical water permeability along, R186
    - physiological ANF effects, R127

## L

- Lactate, endotoxic lethality, glucose dyshomeostasis and, R494
- Laryngeal nerve, superior, sympatholytic response to stimulation, R290
- Leukotriene antagonist, delayed treatment with, pulmonary edema in endotoxin shock (pig), R1007
- Leukotrienes, metabolism and cardiovascular effects, warm and cold acclimation (bullfrog), R834
- Lipogenesis, pregnancy, ovarian steroids and (hamster), R153
- Lipolysis
  - endogenous and exogenous catecholamines, metabolic and hemodynamic responses, R785
  - estradiol effects, sympathetic nerves and, R47
- Lipopolysaccharides
  - endotoxic lethality, glucose dyshomeostasis and, R494
  - lung injured by, FNLP and, R413
  - treatment, pulmonary edema in endotoxin shock (pig), R1007
- Lipoprotein lipase
  - neuropeptide Y effects, energy metabolism, R321
  - regulation, adipose and muscle tissues during fasting, R953
- Lipoxygenase, comparative physiology, invertebrates, R849
- 12-Lipoxygenase, metabolism, nervous system (mollusk), R844
- Lithium, clearance, physiological ANF effects, R127
- Liver
  - vagotomy, hormonal response to exercise and, R67
  - vascular bed, ANP effects on intestinal absorption, R6

LTD: *see* Leukotrienes  
 Lumbar sympathetic nerve, discharge, 8-OHDPAT and, R600

- Lung
  - endotoxin-primed, FNLP injuries and, R413
  - tissue, fibronectin after postoperative ischemia, R553
- Luteinizing hormone, secretion, prolonged exercise effects, R717
- Lymph, intestinal, outflow pressure effects, awake state (sheep), R668
- Lymphatic ducts, isolated, inhibition by ANP, R610

## M

- Macronutrients, intake, type I adrenocorticotrophic receptor stimulation and, R73
- Macrophages, production, somnogenic muramyl peptides, R126
- Magnesium, differential effects, thick ascending limb, kidney, R1023
- Maturation: *see also* Development; Growth
  - ANF decrease with, renal response to, fetus (sheep), R346
  - ANP clearance mechanisms and, R1218
- Melatonin
  - free-running rhythms, sleep and, Antarctica, R1137
  - infusion, suprachiasmatic nucleus lesions and (hamster), R102
  - rhythms, light pulse and high-salt effects, pineal cells (chick), R769
- Membrane, apical, water permeability, proximal tubule, R186
- 3-Mercaptopicolinic acid, hormonal response to exercise, hepatic vagotomy and, R67
- Metabolic arrest, anoxia and, cortical neurons (turtle, rat), R747
- Metabolic rate
  - cold acclimation in, aging effects, R284
  - morphine effects, awake state (pig), R1051
  - prolonged fasting, adaptations to, weaned pups (seal), R267
  - resting, exercise effects on weight cycling, R518
- Methazolamide, fatigue and recovery with, soleus muscle, R615
- Methionine-enkephalin, adrenal, nicotinic and muscarinic-evoked release of, R589
- N-Methyl-D-aspartate, dorsomedial hypothalamus, heart rate and, R13
- 3-Methylhistidine, acute phase response, exercise, R1235
- Metoclopramide, drinking behavior and, water satiation (sheep), R1194
- Microdialysis, sodium chloride, sinoaortic denervation and, brain, R733
- Microelectrodes, interstitial and intracellular pH, dynamics in evolving brain infarct, R581
- Milk, nutrients, intake and use, development of pups and, R1104
- Models
  - oxygen delivery, peripheral nerve, R430
  - physiological, zinc kinetics, R134
  - two-process, sleep deprivation during hibernation (squirrel), R1123
- Morphine
  - fetal EEG activation, muscarinic system and, R509
  - metabolic actions, awake state (pig), R1051

## Motility

- gastrointestinal, vagal innervation, R200
- lymphatic, ANP and, R610
- Muscimol, drug-induced feeding, behavior and, R546

## Muscle

- glutamine metabolism, species differences (holostean, teleost), R159
- lipoprotein lipase regulation, during fasting, R953
- proteolysis, acute phase response in exercise, R1235
- sympathetic, baroreflex modulation of vagal and sympathetic activity, R635

## Muscle, heart

- Fenn effects, variable series elasticity and, R649
- lipoprotein lipase regulation, during fasting, R953
- Muscle, skeletal
  - euglycemic hyperinsulinemia, carbohydrate oxidation, R113
  - Fenn effects, variable series elasticity and, R649
  - hyperglycemia, glucose accumulation and, R698

## Muscle, smooth

- relaxation, ANP and isolated lymph ducts, R610
- vascular, endothelium-derived vasoactive factors and, kidney, R653
- vas deferens, prostanoid effects, R792
- vessels, nonprostanoid endothelium-derived relaxing factor (trout), R925
- Myelinated fibers, conduction blockade in, gaseous and volatile substances, R540
- Myocardium, contractility, bradykinin and, R1095

## N

- Naloxone, vasopressin interaction, during rapid hemorrhage, awake state, R373
- Natriuresis
  - precession of sodium over insulin, renal, R1183
  - pressure, angiotensin II effects, R1200
  - response, lower body negative pressure (monkey), R724
  - substance P and, R232
- Nephrectomy, NEP and C-ANF receptors, ANF pharmacokinetics, R208
- Nephrotic syndrome, precession of sodium over insulin, renal, R1183
- NEP: *see* Endopeptidase, neutral
- Neural control, central, coronary vasoconstriction during, R335
- Neuromodulation, adrenergic, prostanoid effects, vas deferens, R792
- Neuron R15, osmoregulation and (mollusk), R777
- Neurons
  - capsaicin-sensitive, substance P role in, R232
  - cortical, anoxia and metabolic arrest effects (turtle, rat), R747
  - hindbrain, intestinal satiety and, R681
  - medullospinal sympathoexcitatory, 8-OHDPAT and, R600
  - spinal, renal venous pressure and, R27
  - vagal cardioinhibitory, ANF microinjection effects, R1089
  - vasomotor, angiotensin II effects, spontaneous hypertension, R977

Neuropeptide Y  
 adrenal, nicotinic- and muscarinic-evoked release of, R589  
 drug-induced feeding, behavior and, R546  
 intracerebroventricular injection, effects on energy metabolism, R321  
 sympathetic activity and, interscapular brown fat, R328  
 Neurotransmission, adrenergic, prostanoid effects, vas deferens, R792  
 Neutrophils, depletion, endotoxin-primed lung, FNLP injuries, R413  
 Newborn, uncoupling protein, adipose tissue (reindeer), R1229  
 Nitroprusside, ANP effects and, isolated lymph ducts, R610  
 Norepinephrine  
 adrenal, nicotinic- and muscarinic-evoked release of, R589  
 cardiac nerve blockade, awake state, R1176  
 central sympathoinhibition, desipramine effects, R824  
 central venous pressure, exercise training-induced hypervolemia, R273  
 drug-induced feeding, behavior and, R546  
 hyperoxia effects, rest and exercise, R873  
 hypothalamic release, sodium chloride in sinoaortic denervation, R733  
 release, CNS, hypotension and hyperosmolality, awake state, R1071  
 secretory functions, adrenal medulla, R306  
 spillover, yohimbine and, R142  
 spillover to plasma, desipramine effects, R817  
 sympathoadrenal activation, sinoaortic denervation and, after endotoxin, R739  
 tracer kinetics, regional blood flow and site of infusion effects, R946  
 turnover, estradiol and, white adipose tissue, R47  
 Nuclear magnetic resonance,  $^{31}\text{P}$ -, graded carbon dioxide and lactic acidosis, anoxic heart (turtle), R1130  
 Nucleus ambiguus, ANF microinjection to, neuronal and cardiovascular responses, R1089  
 Nutrients  
 intestinal  
 suppression of sham feeding, capsaicin and, R681  
 vagotomy effects on satiety, R503  
 milk, intake and use, development of pups and, R1104  
 mobilization, sympathetic control of, exercise in ventromedial hypothalamic lesions, R368  
 Obesity  
 endogenous and exogenous catecholamines, metabolic and hemodynamic responses, R785  
 insulin effects, anestrous (hamster), R148  
 $\beta$ -oxidation and energy balance in, peroxisome proliferator effects, R278  
 sympathetic control, exercise in ventromedial hypothalamic lesions, R368  
 8-OHDPAT, sympatholytic effects of, rostral medulla and, R600

Opiates, fetal EEG activation, muscarinic system and, R509  
 Opioids, vasopressin interaction, during rapid hemorrhage, awake state, R373  
 Organum cavum pre-lamina terminalis, morphology and physiology, R396  
 Osmoregulation  
 neuron R15 and (mollusk), R777  
 vasopressin secretion, osmotic and non-osmotic tests, R533  
 Osmotic tests, vasopressin secretion, R533  
 Osmorhadium, stimulation, neuron R15 response (mollusk), R777  
 Ovary, prostaglandin synthesis, compartmentalization of (fish), R862  
 Oviparity, prostaglandins and, nonmammalian vertebrates, R854  
 $\beta$ -Oxidation, peroxisome proliferator effects, obesity, R278  
 Oxygen  
 blood, transport, anemia (quail), R798  
 consumption, nerve, model, R430  
 delivery, peripheral nerve, model, R430  
 Oxygenation, nerve tissue, model, R430  
 Oxygen radicals, release, alcohol-induced downregulation of, hepatic phagocytes, R969  
 Oxytocin, receptors: see Receptors

## P

Pacemaker, circadian, high salt mimics light, pineal cells (chick), R769  
 Pacing, atrial, frequency, ANP secretion and, R39  
 Pancreatic cells, A, thermosensitivity of, R480  
 Parabrachial nucleus, cardiovascular influences on, R225  
 Parasympathetic nervous system, facial nerve-elicited cerebral vasodilation, laser-Doppler flowmetry, R255  
 Parathyroid hormone  
 differential effects, thick ascending limb, kidney, R1023  
 immunoreactive, pituitary glands (fish), R622  
 Paraventricular nucleus  
 neuropeptide Y effects, interscapular brown fat, R328  
 norepinephrine release, hypotension and hyperosmolality, awake state, R1071  
 oxytocin receptors, corticotropin-releasing hormone-induced anorexia, R448  
 Penicillin, seizures, respiratory responses to, R934  
 Peptides: see also Polypeptides  
 adrenal, nicotinic- and muscarinic-evoked release of, R589  
 food intake induced by, capsaicin effects, R263  
 hypo- and hypercalcemic, pituitary glands (fish), R622  
 intestinal, brush-border membrane vesicles (fish), R563  
 natriuretic, receptor subtypes for, hypertension, brain, R441  
 regulatory, control of food intake, R689  
 somnogenic muramyl, macrophage production of, R126  
 Permeability  
 tubular, precession of sodium over insulin, R1183  
 water, apical, proximal tubules, R186  
 Peroxisome proliferator,  $\beta$ -oxidation and energy balance with, obesity, R278  
 pH  
 cell regulation, anoxic heart,  $^{31}\text{P}$ -NMR study (turtle), R1130  
 interstitial and intracellular, dynamics in evolving brain infarct, R581  
 phosphate transport and, renal tubules (fish), R704  
 Phagocytes, hepatic, superoxide anion release, alcohol-induced downregulation of, R969  
 Phentolamine, vascular response of choroid plexus and, during hypercapnia, R1066  
 L-Phenylalanine, intestinal, brush-border membrane vesicles (fish), R563  
 Phenylephrine, spontaneous hypertension, renal vascular resistance, R889  
 Phorbol esters, pH effects, phosphate transport, kidney tubules (fish), R704  
 Phorbol 12-myristate 13-acetate, endotoxin shock and, R494  
 Phosphates  
 organic, erythrocyte, oxygen transport and, anemia (quail), 798  
 transport, pH effects, kidney tubules (fish), R704  
 Phosphocreatine, glucose infusion and, hyperglycemia, skeletal muscle, R698  
 Phosphofructokinase, inactivation, during anaerobiosis (mollusk), R1168  
 6-Phosphofructo-2-kinase, inactivation, during anaerobiosis (mollusk), R1168  
 Photoperiodism  
 melatonin infusion, suprachiasmatic nucleus lesions and (hamster), R102  
 suprachiasmatic and paraventricular control (hamster), R90  
 Pilocarpine, adrenal, nicotinic- and muscarinic-evoked release of, R589  
 Pineal cells, circadian pacemaker, high salt mimics light in (chick), R769  
 Pineal gland, circadian rhythms, Antarctica, R1137  
 Pituitary-adrenal axis, metabolic actions of morphine, awake state (pig), R1051  
 Pituitary gland, hypo- and hypercalcemic peptides in (fish), R622  
 Placenta: see also Fetus; Gestation; Pregnancy  
 ACTH secretion, hypoxia and (sheep), R389  
 Plasma  
 constituents: see specific constituent  
 renal flow, cardiopulmonary baroreceptor deactivation and, R642  
 Polydipsia, genetic, angiotensin II effects on water intake, R1152  
 Polypeptides: see also Peptides  
 vasoactive intestine, brain lesions and photoperiodism (hamster), R90  
 Potassium  
 excretion, renal, ANF transgenesis and, R1  
 high, salt-induced acceleration of hypertension and, R21  
 intake, antinatriuretic response to air stress, R941  
 Potassium ions, fluxes, temperature compensation of sodium pump, erythrocytes (trout), R916  
 Potentials, direct current, dynamics in evolving brain infarct, R581

- Prazosin, hyperthermia evoked by, brown fat and, R59  
 Pregnancy: *see also* Fetus; Gestation; Placenta  
   ovarian steroids and, fatty acid synthesis and uptake (hamster), R153  
 Prepyriform cortex, dietary limiting amino acids, distribution of, R525  
 Pressure: *see also* Blood pressure  
   arterial  
     angiotensin II effects, ventrolateral medulla, R977  
     hyperinsulinemia effects, awake state, R764  
     vascular tone influence, after sinoaortic deafferentation, R359  
   atrial, ANP secretion, perfused atria, R39  
   central venous  
     ANF effects, awake state, R247  
     elevated, hypovolemia and, R273  
   glomerular, spontaneous hypertension, R889  
   lower body negative, cardiopulmonary baroreceptor deactivation and, R642  
   lower body positive, renal response to (monkey), R724  
   outflow, intestinal lymph flow and, awake state (sheep), R668  
   renal venous, increase, spinoreticular cell responses, R27  
 Pressure-volume relations, CSF dynamics, experimental brain compression and, R172  
 Procaine, infusion, cardiac nerve blockade and, awake state, R1176  
 Progesterone  
   pregnancy and, fatty acid synthesis (hamster), R153  
   secretion, hypoxic conditions and, placenta (sheep), R389  
 Prolactin  
   brain lesions, photoperiodism and (hamster), R90  
   dopamine modulation of, water satiation (sheep), R1194  
   secretion, prolonged exercise effects, R717  
 Propranolol, hyperthermia evoked by, brown fat and, R59  
 Prorenin, recombinant infusion, half-life, hemodynamic, renal and hormonal effects (monkey), R804  
 Prostacyclin, synthesis, angiotensin receptor mediation of, C6 glioma cells, R1000  
 Prostaglandin E, pre- and postjunctional effects, vas deferens, R792  
 Prostaglandin E<sub>1</sub>, hyperthermia evoked by, brown fat and, R59  
 Prostaglandins  
   comparative physiology, invertebrates, R849  
   emesis, learned aversion and chemical defense (fish), R839  
   oviducal function, parturient behavior and, nonmammalian vertebrates, R854  
   regulation, hydrogen secretion, epithelia (frog), R866  
   synthesis  
     angiotensin receptor mediation of, C6 glioma cells, R1000  
     compartmentalization of, ovary (fish), R862
- Prostanoids, pre- and postjunctional effects, vas deferens, R792  
 Protein  
   balance, milk intake and use and, pup, R1104  
   heat-shock, heat-induced hyperthermia and, R663  
   synthesis, amino acid injection, prepyriform cortex, R525  
   uncoupling, brown fat, newborn (reindeer), R1229  
 Protein kinase C  
   endotoxic lethality, glucose dyshomeostasis and, R494  
   hydrogen ion secretion and, epithelia (frog), R866  
 Puberty, suppression of, exercise, R717  
 Pump, sodium, thermal adaptation, erythrocytes (trout), R916
- Q**
- Quadriplegia, wheelchair-dependent, carotid-cardiac vagal baroreflex in, R576
- R**
- Receptors  
   adrenergic, brown fat thermogenesis and fever, R59  
    $\alpha_1$ -adrenergic, renal vascular responsiveness, hypertension after, R889  
    $\beta_2$ -adrenergic, catecholamine action and, endolymphatic sac, R911  
    $\alpha$ -adrenoceptor subtypes, during development (sheep), R407  
   angiotensin, prostaglandin synthesis and, C6 glioma cells, R1000  
   baroreceptor, cardiopulmonary deactivation, responses to, R642  
   C-ANF, ANF pharmacokinetics, R208  
   CCK-A, mediation of food intake, R693  
   excitatory amino acid, dorsomedial hypothalamus and heart rate, R13  
   interleukin 1, antagonist, sleep and fever with, R453  
   mechanoreceptors  
     renal, substance P and, R232  
     visceral, inhibition of gastric distension, R985  
   oropharyngeal, water satiation, dopamine effects (sheep), R1194  
   oxytocin, brain, CRH-induced anorexia and, R448  
   type I adrenocorticoid, stimulation, macronutrient intake and, R73  
 Reflexes  
   baroreflex  
     arterial, gastric distension effects, R985  
     cardiopulmonary, volume expansion and, R32  
     denervated and innervated medullary functions, R306  
     differential modulation of vagal and sympathetic activity, R635  
     8-OHDPAT and, R600  
     vagal, quadriplegics, R576  
     vagal, response after exercise, R570  
   renorenal, inhibitory, substance P and, R232  
 Renal nerve  
   afferent, activity, substance P and, R232  
   sodium retention and, cirrhosis and congestive heart failure, R298
- Renal vein, occlusion, spinoreticular cell response, R27  
 Renin  
   plasma activity, cardiac nerve blockade and, R1176  
   water intake and, genetic polydipsia, R1152  
 Renin-angiotensin-aldosterone system, physiological ANF effects, R127  
 Renin-angiotensin system, cardiopulmonary baroreceptor deactivation and, R642  
 Resistance  
   insulin, carbohydrate oxidation, skeletal muscle, R113  
   membrane, cortical neurons (turtle, rat), R747  
   peripheral  
     ANF effects, awake state, R247  
     endothelin-1 and sarafotoxin S6b effects, awake state, R1210  
     volume expansion and, R32  
   renal vascular, salt-induced hypertension and, R21  
   vascular, after sinoaortic deafferentation, R359  
 Respiratory distress syndrome, adult, pulmonary edema in endotoxic shock (pig), R1007  
 Respiratory regulation, seizures, R934  
 Reticulocytes, organic phosphates, blood oxygen transport in anemia and (quail), R798  
 Rhythms  
   circadian  
     high salt mimics light, pineal cells (chick), R769  
     suprachiasmatic nucleus response to melatonin and (hamster), R102  
   free-running, melatonin, cortisol, electrolytes, and sleep, Antarctica, R1137  
   seasonal, brain lesions and peptides (hamster), R90  
   sympathetic, postganglionic, differential relationships, R1159  
 Ribonucleic acid, messenger, lipoprotein lipase regulation, adipose tissue, R953  
 Rostroventrolateral medulla, sympatholytic effects of 8-OHDPAT, R600
- S**
- Salbutamol, action on endolymphatic sac DC potential,  $\beta_2$ -receptor mediation of, R911  
 Saline, hypertonic, thirst and vasopressin release, R475  
 Salt  
   appetite, angiotensin II-aldosterone synergy, R421  
   sensitivity  
     hemodynamic responses to volume expansion, R32  
     hypertension, high-potassium diet and, R21  
 Sarafotoxin S6b, endothelin-1 and, regional hemodynamics in awake state, R1210  
 Saralasin, chronic hypertension and, fetus (lamb), R811  
 Sarcoplasmic reticulum, cardiac mechanical restitution, seasonal changes (squirrel), R353

- Satiety**  
 bombesin-induced suppression of food intake, capsaicin effects, R263  
 CCK, glucagon and, R689  
 flavor preferences, CCK conditions and, R179  
 food intake and hunger, high fat and carbohydrate effects, R756  
 insulin regulation, food intake, seasonal changes (marmot), R712  
 intestinal  
   hindbrain neurons and, R681  
   vagotomy effects, R503  
   reduction of food intake, CCK-8 and soup interaction, R672  
**Seizures**, respiratory responses to, R934  
**Senescence**, cold acclimation, metabolic and behavioral responses, R284  
**Sepsis**, postoperative, kinetics of plasma fibronectin, R553  
**Serotonin**  
   central, cardiovascular actions of, vasopressin effects, R1188  
   receptors, 8-OHDPAT and, R600  
**Sexual dimorphism**, sodium deprivation, sodium appetite after, R1082  
**Shock**  
   endotoxic  
     phorbol 12-myristate 13-acetate and, R494  
     pulmonary edema in, LTD antagonist treatment (pig), R1007  
**Skin**, hydrogen ion secretion, prostaglandin regulation of (frog), R866  
**Sleep**  
   deprivation, during hibernation (squirrel), R1123  
   diabetes, interleukin 1 effects, R995  
   free-running rhythms, Antarctica, R1137  
   interleukin 1 effects, R52  
   production of muramyl peptides, macrophages, R126  
**Sodium**  
   appetite, after prolonged sodium deprivation, R1082  
   deprivation, sodium appetite after, R1082  
   differential effects, thick ascending limb, kidney, R1023  
   excretion  
     hyperinsulinemia and arterial pressure, awake state, R764  
     renal, ANF transgenesis and, R1  
     renal precession of sodium over insulin and, R1183  
     time course of renal responses, R894  
     urinary, potassium supplementation effects, R941  
   retention, cirrhosis and congestive heart failure, renal nerve in, R298  
   urinary, ANF decrease with maturation and, fetus (sheep), R346  
**Sodium chloride**  
   absorption, ANP effects, intestine, R6  
   appetite, angiotensin II-aldosterone synergy, R421  
   sinoaortic denervation, hypothalamic norepinephrine release and cardiovascular response to, R733  
**Soleus muscle**, fatigue and recovery, intracellular carbonic anhydrase isoform and, R615  
**Somatostatin**, glucose infusion and, hyperglycemia, skeletal muscle, R698  
**Sonomicrometry**, bradykinin effects, myocardial contractility, R1095  
**Spaceflight**, renal response, lower body negative pressure (monkey), R724  
**Species differences**, glutamine metabolism (holostean, teleost), R159  
**Spinal cord**, discharges, postganglionic sympathetic nerves, R1159  
**Spinoreticular cells**, responses, renal venous pressure increase, R27  
**Splanchnic afferents**, arterial baroreflex inhibition and, gastric distension, R985  
**Splanchnic nerve**, stimulation, time course of renal responses to, R894  
**Staphylococci**, digestion of, macrophage production of somnogenic muramyl peptides during, R126  
**Starvation: see Fasting**  
**Steroids**, ovarian, pregnancy and, fatty acid synthesis (hamster), R153  
**Stomach**  
   reduction of food intake, CCK-8 and soup interaction, R672  
   vagal innervation, topography, R200  
**Streptozocin**, diabetes, sleep in, interleukin 1 effects, R995  
**Stress**  
   air, antinatriuretic response to, high potassium intake effects, R941  
   HSP70 and mRNA expression, heat-induced hyperthermia and, R663  
   Substance P, renorenal reflexes and, R232  
   Sucrose, starch taste, chemoreception for, R192  
   Sulfonamide, fatigue and recovery with, soleus muscle, R615  
   Superoxide anion, release, alcohol-induced downregulation of, hepatic phagocytes, R969  
   Suprachiasmatic nucleus, lesions, melatonin infusions and (hamster), R102  
   Sweat, eccrine, cysteine proteinase inhibitor of, R314  
   Sweat gland, eccrine, cysteine proteinase inhibitor of, R314  
**Sympathetic activity**  
   differential baroreflex modulation of, R635  
   hyperoxia effects, rest and exercise, R873  
   neuropeptide Y effects, interscapular brown fat, R328  
   vagal baroreflex response, after acute exercise, R570  
**Sympathetic nerves**  
   activity, yohimbine and, R142  
   central sympathoinhibition, desipramine effects, R824  
   estradiol effects and, white adipose tissue, R47  
   firing, desipramine effects, R817  
   postganglionic, discharges of, differential relationships, R1159  
   renal  
     activity in cirrhosis and heart failure, R298  
     air stress, potassium supplementation and, R941  
     regulation of glomerular ANF receptor subtypes, R1043  
     time course of responses to stimulation, R894  
**Sympathetic nervous system**  
   control during exercise, ventromedial hypothalamic lesions, R368  
   norepinephrine release, sodium chloride in sinoaortic denervation, R733  
   norepinephrine tracer kinetics, regional blood flow and site of infusion effects, R946  
   Sympathetic outflow, blood pressure and, angiotensin II and ANP interactions, R1145  
   Sympatholytic response, stimulation, superior laryngeal nerve, R290
- T**
- Taste: see Gustatory response**  
**Taurine**  
   efflux, volume-activated, erythrocytes (skate), R1014  
   transport, renal brush-border membrane (snake), R879  
**Temperature**  
   adaptation, sodium pump, erythrocytes (trout), R916  
   air, ventilation and thermoregulation (bat), R960  
   ambient, cold acclimation, aging effects, R284  
   production of muramyl peptides, macrophages, R126  
   regulation, behavioral, R120  
**Temperature, body**  
   brain  
     interleukin, insulin, and sleep, R995  
     laterality in thermoregulatory responses, R486  
     sleep deprivation during hibernation (squirrel), R1123  
     hypoxia effects, R120  
     low, myocardial contraction (squirrel), R353  
     ventilation rates and, air temperature effects (bat), R960  
**Thermogenesis**  
   brown fat, fever and, R59  
   nonshivering, uncoupling protein, adipose tissue, newborn (reindeer), R1229  
**Thermoregulation**  
   aging effects, metabolic and behavioral responses, R284  
   behavioral, hypoxia effects, R120  
   laterality in, R487  
   ventilation rates and, air temperature effects (bat), R960  
**Thirst: see Drinking**  
**Thyroid-stimulating hormone**, secretion, prolonged exercise effects, R717  
**TNF: see Tumor necrosis factor**  
**Toxicity**, chemical, behavioral thermoregulation, R120  
**Trace metals**, zinc kinetics, R134  
**Training: see Exercise**  
**Trauma**, IL-6 and TNF levels after, differential alterations in, R167  
**Tumor necrosis factor**  
   acute phase response, exercise, R1235  
   anorexia induced by, area postrema lesions and, R906  
   plasma levels, after trauma and hemorrhage, R167
- U**
- Umbilical vein**, hypoxic conditions, ACTH secretion (sheep), R389  
**Urinary bladder**, hydrogen ion secretion, prostaglandin regulation of (frog), R866  
**Urinary output**, prolonged fasting, adaptations to, weaned pups (seal), R267

Uterine vein, hypoxic conditions, ACTH secretion (sheep), R389

## V

- Vagotomy
  - hepatic, hormonal response to exercise and, R67
  - satiety and, intestinal, R503
- Vagus nerve
  - capsaicin, suppression of sham feeding, R681
  - efferent, innervation, gastrointestinal tract, R200
  - intestinal satiety and, R503
- Vas deferens, prostanoid effects, R792
- Vasoconstriction
  - arterial pressure lability and, after sinoaortic deafferentation, R359
  - coronary, stimulation in hypothalamic defense region, R335
  - endothelium-derived relaxing factor, nonprostanoid (trout), R925
- Vasodilation
  - cerebral, facial nerve-elicited, R255
  - endothelium-derived relaxing factor, nonprostanoid (trout), R925
- Vasomotor activity, thermoregulatory, hypothalamic signals controlling, R486
- Vasopressin: *see also* Antidiuretic hormone
  - arginine
    - hypoxia and hypercapnia, late-gestation fetus (sheep), R1077
    - response to epinephrine, fetal (sheep), R82
  - autonomic mechanisms and, central serotonin actions, R1188

## SUBJECT INDEX TO VOLUME 29

- central venous pressure, exercise training-induced hypervolemia, R273
- dopamine modulation of, water satiation (sheep), R1194
- opioid interaction, during rapid hemorrhage, awake state, R373
- peripheral mechanism of lability, after sinoaortic deafferentation, R359
- release, ANP effects, R475
- secretion, osmotic and nonosmotic tests, R533
- vagal baroreflex response, wheelchair-dependent quadriplegics, R576
- Vasoreactivity, systemic, chronic hypoxia and, R1114
- Ventilation
  - responses, seizures, R934
  - thermoregulation and, air temperature effects (bat), R960
- Ventrolateral medulla
  - angiotensin II effects, spontaneous hypertension, R977
  - superior laryngeal nerve, sympatholytic response to stimulation, R290
- Visceral afferents, capsaicin, suppression of sham feeding, R681
- Vitamin E, cytokines and, acute phase response in exercise, R1235
- Viviparity, prostaglandins and, nonmammalian vertebrates, R854
- Volume: *see also* Blood volume
  - expansion
    - angiotensin II effects, R1200
    - hemodynamic responses, Dahl salt-sensitivity, R32
    - renal response to lower body negative pressure (monkey), R724
  - taurine efflux activated by, erythrocytes (skate), R1014

## W

- Water
  - absorption, ANP effects, intestine, R6
  - evaporative loss, milk intake and use and, pup, R1104
  - hydrogen incorporation, body fat (pig), R627
- intake
  - angiotensin II-aldosterone synergy, R421
  - angiotensin II effects, genetic polydipsia, R1152
- permeability: *see* Permeability
- turnover rate, adaptations to fasting, weaned pups (seal), R267
- Weight
  - body
    - cycling, fat intake during, exercise effects, R518
    - suprachiasmatic and paraventricular control (hamster), R90
    - suprachiasmatic nucleus lesions and (hamster), R102
- Weightlessness, renal response, lower body negative pressure (monkey), R724

## X

- Xanthine oxidase, lung primed with, FNLP injuries, R413

## Y

- Yohimbine, sympathetic nerve activity, norepinephrine spillover and, R142

## Z

- Zinc, metabolism, simultaneous administration of radioactive and stable zinc isotopes, R134
